## RISE Program Overview

RISE is the USAV Indoor evaluation program for officials holding or pursuing National-level certifications. The efforts of RISE Referee Coaches are focused on helping our fellow officials be the best they can be, while at the same time assisting the Officials Development Team in placing officials in situations where they can be successful at the various USAV National Championships.

All National-level officials in attendance at designated USAV National Championships should receive a RISE Review at least once during their 5-year membership cycle as part of the standard re-evaluation program. This includes evaluations conducted by a head official at USAV National Championships during finals matches.

RISE Reviews use a targeted evaluation form comprised of 4 sections that define the acronym, “RISE”:

**REFLECT** - Events/situations from the match where philosophical and/or preferred techniques may be used for reflection by the referee during the debrief and applied in future matches.

**IMPLEMENT** - An indication of the referee’s professionalism, knowledge of the rules, ability to control the match and how the referee implemented these skills while conducting the match.

**SET GOALS** - Referees should continuously be setting goals for themselves. This section identifies current areas of strength as well as opportunities for improvement.

**EVALUATE** - As a National level official, the expected standard for the evaluated categories in this section is “Good” for all matches you conduct. The referee’s performance in that particular match dictates whether the evaluation moves to one side or the other of column 3.

Additionally, RISE offers the following candidate-level programs for officials looking to obtain or advance their national-level certifications through USA Volleyball:

- RISE Candidate Program & Candidate Course
- RISE Expired or Retired Candidate Course
- RISE Foreign National and International Reciprocity Program & Candidate Course
- RISE PAVO National Reciprocity Program & Candidate Course
